ABOUT

I'm a UI/UX and Product Designer based in New Jersey, with design experience since 2016 and a focus on building digital products that are clear, useful, and conversion-driven. I'm currently completing a BFA in Design and Animation at Monmouth University while leading end-to-end product design for Verity Protect, from UX strategy to shipped UI. I specialize in Figma, design systems, and prototyping, and I collaborate closely with developers to deliver production-ready experiences.

WORK EXPERIENCE

VERITY PROTECT | Founder & Product Designer, Engineer REMOTE | 2026-Present

- Led end-to-end product design for an iOS call-screening app, from concept through App Store launch.
- Defined UX strategy and designed high-fidelity UI flows for onboarding, alerts, transcripts, and fraud-scoring experiences.
- Built and maintained a scalable design system with components, states, and interaction patterns to support faster product iteration.
- Implemented production React Native interfaces and reduced design-to-development rework by 60%.

RSP MEDIA | Photo Editor, Layout Intern Pompton Plains, NJ | 2024-Present

- Photographed high-end jewelry using controlled multi-light setups and angle testing to capture accurate detail and material texture.
- Edited and color-corrected image assets for print and digital channels, maintaining consistent visual quality across deliverables.
- Supported layout production for marketing collateral and magazine spreads, preparing final assets for publication.

PACKANACK GOLF CLUB | Web Manager, Golf Shop Assistant Wayne, NJ | 2023-Present

- Manage and update the club website, keeping member-facing information current across tee times, events, and announcements.
- Improve site UX and content structure so members can find key information faster and complete tasks with less friction.
- Support daily golf shop operations, including opening/closing procedures and in-person member service.
- Coordinate with staff to align web updates with real-time club operations and seasonal programming.

SAGEAIO | Founder, Digital Manager, UI Designer Remote | 2021-2023

- Founded and managed a retail solutions startup, coordinating a distributed team of developers and designers across multiple countries.
- Designed user interfaces for the brand's digital products and website, focusing on usability, visual consistency, and conversion flow.
- Led social media strategy and content operations, growing audience reach to 10,000+ followers.
